## UNLIMITED DESIGN POSSIBILITIES

MatrixGold 2019 is our newest, most powerful CAD software to date, and it brings a wealth of fresh features and benefits - including all the features fans of MatrixGold Essentials appreciated.

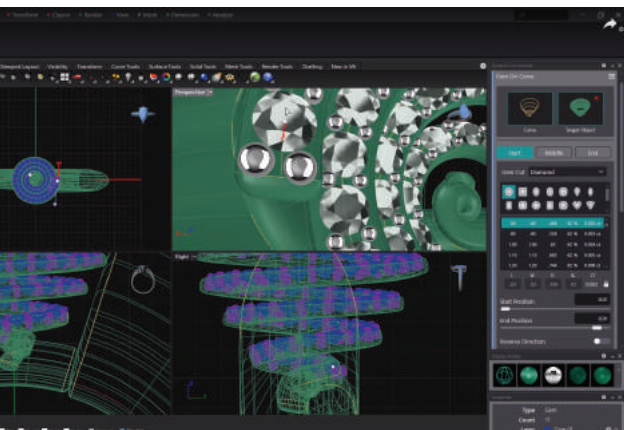

But MatrixGold 2019 offers even more, including, but not limited to

- > Dynamic Booleans, which allow you to edit the steps prior to the Boolean operation
- > Parametric history, which allows you to create your own flexible custom library to make quick edits and variations of your models.
- > Libraries of content that provide a starting point for your designs, along with the ability to build your own libraries.
- > An advanced user interface that's completely customisable to your work preferences.

Everything about MatrixGold 2019 was designed to make you a more efficient designer and unleash your full customisation potential: the upgraded CAD engine, the improved speed and responsiveness, the new content organization - everything.

This freeform, organic modeling plugin provides functions similar to carving and shaping physical clay.

*Designed to work inside MatrixGold*
